Arena fight rules

The Arena is a round circle with a max diameter of 28" which Leviathans cannot leave. The models are placed 19" apart.

The game uses special fight cards alongside standard warscroll and AoS with the following amendments:

- no command or allegiance abilities
- ignore priority rolls
- use the movement value listed in the chosen card, you can move in and out of combat at will (retreating is not a rule here), reach decides if you can hit or be hit

You start with all the nine fight cards in your hand. Each player picks one card for that turn (representing their Leviathan's action) and places it face down in front of them. All players reveal their cards simultaneously and the highest speed decides to go first or second, with players rolling off if their speed is the same.

Once all actions have been completed players leave their played card face up on the table so others can see what has been played.

Now pick the next action from the remaining 8 cards in your hand and place it face down while returning the face up card used in the previous turn to your hand. **This means you can never do the same action twice in a row.** Repeat the steps above until the game ends with one Leviathan remaining.

Turn sequence

1. Pick card
2. Highest speed activates - move, ranged attack (if possible) and then melee
3. Next highest speed activates
4. Leave played card and repeat the above steps.
