IMPERIALIS MILITIA & CULTS

TIDE OF HUMANITY

This book contains all the datasheets that you will need to fight battles with your Imperialis Militia & Cults miniatures, and the rules for the weapons they can wield in battle. Each datasheet includes the characteristics profiles of the unit it describes, as well as any wargear and special abilities it may have. Any abilities that are common to several units are described below and referenced on the datasheets themselves.

KEYWORDS

Throughout this book, you will come across a keyword that is within angular brackets, specifically <FEALTY>. This is shorthand for a keyword of your choosing, as described below.

<FEALTY>

In games set in the Age of Darkness, your army will either fight on the side of the loyalists or the traitors. When you build your army, pick which you wish it to be. If you pick loyalist, then all units with the <FEALTY> keyword have this keyword changed to **LOYALIST**. If you pick traitor, then all units with the <FEALTY> keyword have this keyword changed to **TRAITOR**.

All units in your army must have the same allegiance. Some unique characters or specific units can already have **TRAITOR** or **LOYALIST** printed on their datasheet, in which case they can only be taken in armies with the matching allegiance.

SUPPORT

A unit with this keyword cannot be taken as a compulsory choice for the category of the Force Organisation chart that it is in.

PLAYING GAMES IN THE AGE OF DARKNESS

Lords of War: Your armies may include detachments of Lords of War as normal, but the total points value/power rating of the Lords of War choices in your army may not be more than 25% the total army points value/power rating, rounding up.

Cities of Death: The battlefields of the Horus Heresy were nightmarish sites of destruction. We recommend using the Advanced Rules for terrain from page 260 of the Warhammer 40,000 rulebook, including counting all ruins as City Ruins.

Prepared Positions: The player who has the second turn in the first battle round has access to the following Stratagem (2CP): Use this Stratagem at the start of the first battle round, before the first turn begins. Until the end of the first turn, all units from your army that are wholly within your Deployment Zone, other than Titanic units, receive the benefit of cover, even while they are not entirely on or in a terrain feature. A unit that is already receiving the benefit of cover gains no additional benefit from this Stratagem.

Psychic focus: With the exception of Smite, each psychic power can be attempted only once per turn, rather than once per psyker per turn. In addition, you must add 1 to the warp charge value of Smite for each attempt (whether successful or not) that has been made to manifest Smite during a given Psychic phase, to a maximum warp charge value of 11.

Strategic Discipline: The same Stratagem cannot be used by the same player more than once during any single phase.

Sudden Death: If, at the end of any battle round, one player has no models left on the battlefield, the game ends immediately and that player loses. Fortifications do not count for the purposes of this rule.

Tactical Reserves: Instead of being set up on the battlefield during Deployment, many units have the ability to be set up on teleportariums, in high orbit, in ambush, etc., in order to arrive on the battlefield mid-game as reinforcements. When setting up your army during Deployment for a matched play game, at least half the total number of units in your army must be set up on the battlefield, and the combined points value of all the units you set up on the battlefield during Deployment (including those that are embarked within Transports that are set up on the battlefield) must be at least half of your army's total points value, even if every unit in your army has an ability that would allow them to be set up elsewhere.

Furthermore, in matched play games, units that are not placed on the battlefield during deployment in order to arrive on the battle mid-game as reinforcements cannot arrive on the battlefield during the first battle round. Finally, any unit that has not arrived on the battlefield by the end of the third battle round in a matched play game counts as having been destroyed.

A NOTE ON CHAINWORDS

This document makes exclusive reference to chainsword(s) throughout. However if a model is physically armed with a combat blade and its entry states it has a chainsword then it should be considered to have a chainsword for all purposes. This is because chainswords and combat blades function identically in the 8th edition rules and the terms are used interchangeably in the Horus Heresy books. I have simply omitted writing chainsword/combat

WARGEAR OPTIONS

- Any model can replace its battle cannon with a demolisher cannon, an exterminator autocannon, a twin lascannon or a vanquisher battle cannon.
- Any model can replace its heavy bolter with a heavy flamer or a lascannon.
- Any model can take two heavy bolters or two heavy flamers in sponsons.
- Any model can take an heavy stubber or a combi-bolter.
- Any model can take a hunter-killer missile.

ABILITIES

Vehicle Squadron: The first time that this unit is set up, all models in this unit must be placed within 6" of each other. From that point onwards, each operates independently and is treated as a separate unit for all rules purposes.

Grinding Advance: If this model moves under half speed in its Movement phase (i.e. it moves a distance in inches less than half of its current Move characteristic) it can shoot its turret weapon twice in the following Shooting phase (the turret weapon must target the same unit both times). Furthermore, hit rolls for this model's turret weapon do not suffer the penalty for moving and shooting a Heavy weapon. The following weapons are turret weapons: battle cannon, demolisher cannon, twin lascannon, exterminator autocannon and vanquisher battle cannon.

Smoke Launchers: Once per game, instead of shooting any weapons in the Shooting phase, this model can use its smoke launchers; until your next Shooting phase your opponent must subtract 1 from all hit rolls for ranged weapons that target this vehicle.

Explodes: If this model is reduced to 0 wounds, roll a D6 before removing it from the battlefield and before any embarked models disembark. On a 6 it explodes, and each unit within 6" suffers D3 mortal wounds.

ABILITIES
Aerial Assault: During deployment, you can set this unit up in the skies instead of placing it on the battlefield. At the end of any of your Movement phases, this unit may fly into battle - set it up anywhere on the battlefield that is more than 9" away from enemy models.

Airborne: This model cannot charge, can only be charged by units that can **FLY**, and can only attack or be attacked in the Fight phase by units that can **FLY**.

Crash and Burn: If this model is reduced to 0 wounds, roll a D6 before removing it from the battlefield and before any embarked models disembark; on a 6 it crashes and explodes, and each unit within 6" suffers D3 mortal wounds.

Supersonic: Each time this model moves first pivot it on the spot up to 90° (this does not contribute to how far the model moves), and then move the model straight forwards. Note that it cannot pivot again after the initial pivot. When this model Advances increase its Move characteristic by 20" until the end of the phase - do not roll a dice.

Hard to Hit: Your opponent must subtract 1 from hit rolls for attacks that target this model in the Shooting phase.

Hover Jet: Before this model moves in your Movement phase, you can declare it will hover. Its Move characteristic becomes 20" until the end of the phase and it loses the **Airborne**, **Supersonic** and **Hard to Hit** abilities until the beginning of your next Movement phase.

Repair: Roll a D6 at the end of this model's movement; on a 6, this model regains 1 lost wound.

Vehicle Squadron: The first time that this unit is set up, all models in this unit must be placed within 6" of each other. From that point onwards, each operates independently and is treated as a separate unit for all rules purposes.

TRANSPORT	This model can transport 12 MILITIA INFANTRY models. Each Militia Fireteam takes up the space of two other models and each Militia Brute takes up the space of three other models.

THE IMPERIAL ARMY

In this section you'll find rules for Battle-forged armies that include Imperialis Militia & Cults Detachments - that is, any Detachment which only includes **MILITIA** units. These rules include the abilities below and a series of Stratagems. This section also includes the Astartes' uniwue Warlord Traits, Psychic Disciplines and Relics. Together, these rules reflect the character and fighting style of the Imperial Army in your games.

ABILITIES

If your army is Battle-forged, Imperialis Militia & Cults Detachments within it gain the following abilities:

OBJECTIVE SECURED

If this detachment is comprised of only **MILITIA** units, all Troops units within this detachment gain this ability. Such a unit that is within range of an objective marker (as specified in the mission) controls the objective marker even if there are more enemy models within range of that objective marker. If an enemy unit within range of the same objective marker has a similar ability, then the objective marker is controlled by the player who has the most models within range of it as normal.

Other units may also have the Objective Secured ability, this is listed in the abilities section of their datasheet where appropriate.

PROVENANCES

Provenances of war are facets of a particular force which represent the nature of the world from which it originates or the particular character and background of the warriors themselves. The Force Commander may represent a planetary overlord, cult leader, local warlord, merchant prince or any other title, and this system is designed to allow you to tailor your army accordingly.

If a Battle-forged **MILITIA** Detachment includes a **FORCE COMMANDER**, it may select up to two provenances from the list below. Unless noted, the effects of the provenance apply to all **MILITIA** units in the whole army with the **PROVENANCE** keyword.

ADDITIONAL LORDS OF WAR

In addition to the vehicles listed in this document, bear in mind that your army can also include detachments of Crusade Reserves as listed in the *Battles in the Age of Darkness* document.

PROVENANCES OF WAR

ABHUMAN HELOTS

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units add 1 to their Toughness characteristic.
- **PROVENANCE** units may take Discipline Collars.

ALCHEM-JACKERS

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units add 2 to their Leadership characteristic if they fought in the Fight phase this turn.
- **PROVENANCE** units may take Frenzon.
- This provenance may not be selected alongside Tainted Flesh.

CULT HORDE

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units can re-roll Morale checks and can ignore the -1 to hit penalty for firing heavy weapons when moving, or fring assault weapons when Advancing.
- All models in **PROVENANCE** units must always charge the nearest enemy unit if they are in range to do so at the start of the Charge phase.
- All models in **PROVENANCE** units reduce their Ballistic Skill to 6+.
- **MILITIA GRENADIER SQUADS** may not be taken in your army.
- **ROGUE PSYKERS** may be taken in your army.
- All **MILITIA** units in the army must be **TRAITORS**.
- This provenance may not be selected alongside Survivors of the Dark Age.

CYBER-AUGMETICS

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units are granted a 6+ invulnerable save (or improve existing invulnerable saves by 1 to a maximum of 3+).
- All models in **PROVENANCE** units reduce their Advance and consolidation moves by 1".
- This provenance may not be selected alongside Gene-Crafted.

FERAL WARRIORS

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units improve their Weapon Skill characteristic by 1. This does not apply to **MILITIA OGRYN BRUTE SQUADS**.
- **PROVENANCE** units may take Wicked Blades. **MILITIA OGRYN BRUTE SQUADS** automatically get this upgrade at no cost.
- **MILITIA** detachments in this army may never have more **VEHICLE** units than **INFANTRY** units.

GENE-CRAFTED

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units add 1 to their Strength characteristic.
- **MILITIA INDUCTED LEVY SQUADS** gain the **SUPPORT** keyword
- This provenance may not be selected alongside Tainted Flesh.

SURVIVORS OF THE DARK AGE

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units add 1 to their Save characteristic.
- Compulsory Troops choices in any **MILITIA** detachment must be **MILITIA GRENADIER SQUADS**.
- **MILITIA GRENADIER SQUADS** and **MILITIA COMMAND CADRES** may take Advanced Weapons.
- **MILITIA DARK AGE RHINOS** and **MILITIA DARK AGE LAND RAIDER PROTEUS'** can be taken in your army and **MILITIA ARVUS LIGHTER SQUADRONS** may be taken as Dedicated Transports. However, only **MILITIA GRENADIER SQUADS** and **MILITIA COMMAND CADRES** can be set up inside them during deployment..
- **MILITIA INDUCTED LEVY SQUADS** gain the **SUPPORT** keyword.
- This provenance may not be selected alongside Cult Horde or Tainted Flesh.

TAINTED FLESH

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units may roll a dice each time they suffer a wound; on a roll of 6 that wound is ignored.
- All models in **PROVENANCE** units may replace their brutal assault weapons with rending claws.
- Compulsory Troops choices in any **MILITIA** detachment must be **MILITIA INDUCTED LEVY SQUADS**. In addition, it may not take more non-**CHARACTER INFANTRY** choices than **MILITIA INDUCTED LEVY SQUADS**.
- **MILITIA PLATOON COMMANDERS**, **DISCIPLINE MASTERS** and **MILITIA COMMAND CADRES** may not be taken in your army.
- **ROGUE PSYKERS** and **MUTANT SPAWN** may be taken in your army.
- All **MILITIA** units in the army must be **TRAITORS**.
- This provenance may not be selected alongside Survivors of the Dark Age, Gene-Crafted or Alchem-Jackers.

WARRIOR ELITE

Though the Legions were large, they were often confronted with armies numbering in the millions. The answer to this was often to retain air superiority, allowing the Legion's force to rapidly redeploy again and again without becoming mired amid a sea of foes.

- All models in **PROVENANCE** units add 1 to their Leadership characteristic.
- **MILITIA INDUCTED LEVY SQUADS** gain the **SUPPORT** keyword

RELICS OF THE EMPIRE

The armies of the Imperialis Militia were vast, and drawn from the fighting forces of many different human worlds. Some of these had unique technological developments, or had sequestered ancient artefacts since before the fall of Old Night.

If your army is led by an Imperialis Militia & Cults Warlord, you may give one of the following Relics to an Imperialis Militia & Cults Character in your army. Named characters already have one or more rare artefacts, and so cannot be given any of the following relics. Note that some weapons replace one of the character's existing weapons. Where this is the case, you must, if you are playing a matched play game or are otherwise using points values, still pay the cost of the weapons being replaced. Write down any Relics your characters may have on your army roster.

ARCHEO-CLOAK

Various methods of confounding and confusing scanners have been encountered by the Mechanicum upon discovery of a human outpost. In many cases, they are short-ranged devices, able to conceal a small group from the attention of prying eyes for long enough to get into position.

During deployment, you can set up the bearer and one **MILITIA INFANTRY** unit behind enemy lines instead of placing them on the battlefield. At the end of any of your Movement phases, these units can launch their daring attack; set them up within 3" of each other, anywhere on the battlefield that is wholly within 6" of any battlefield edge and more than 9" away from enemy models.

CLOAKING ARRAY

This relic generates a highly localised refraction field that distorts light and other waveforms in such a way as to render the bearer invisible to the naked eye and most forms of machine scanner.

Ranged attacks targeting the bearer of the Cloaking Array suffer a -1 penalty to hit rolls.

COMBAT AUGMENT ARRAY

It is posited that this device was once used to transform entire planetary populations into killing machines at a single command, enabling simple colonists to become super-soldiers. Though dangerous to use, extant examples command a high price indeed.

Add 1 to the bearer's Strength and Attacks characteristics.

NANYTE BLASTER

This is a bullet shaped weapon of gleaming metal that hosts a hive of nanoscopic machines. Upon release, they are capable of stripping a target to its constituent atoms in an instant.

This weapon replaces a model's bolt pistol. It has the following profile:

WEAPON	R	TYPE	S	AP	D	ABILITIES
Blaster	12"	Pistol	3	5	-2	1 -

ORDER OF VALOUR

Many of the human worlds encountered by the Great Crusade had strong martial traditions, often based around aristocratic membership of elite military units. The bearer of this medal was a famed member of such a unit.

Each time the bearer suffers a wound or mortal wound, roll a dice; on a 4+, the wound is ignored.

PHASE WALKER

Very few examples of this technology have been recovered. The relic uses a phase dilation generator to allow its bearer to 'phase-walk' from one location to the next in an instant, making it highly prized by assassins and saboteurs.

Once per game, at the end of any of your Movement phases, the bearer of the Phase-walker can teleport instead of moving normally. When they do so, remove them from the battlefield and then replace them anywhere that is within 18" of their starting position and more than 9" from any enemy models.

WARP SHUNT FIELD

A fearful hybrid of displacer field and void shield technology, the device projects a localised warp interface field, which is activated when it detects a high energy attack. Enemy shots are absorbed through microscopic, short-lived warp openings to protect the bearer from harm.

The bearer of a Warp Shunt Field always gains the benefit to its saving throw for being in cover. Additionally, any saving throws of 7+ made against ranged attacks inflict a mortal wound on the unit that made the attack.

STRATAGEMS

If your army is Battle-forged and includes any Imperialis Militia & Cults Detachments (excluding Auxiliary Support Detachments) you have access to the Stratagems shown here, and can spend Command Points to activate them. These reflect the unique strategies used by the Imperial Army on the battlefield.

TAKE COVER

Militia & Cults Stratagem

1
CP

Use this Stratagem in your opponent's shooting phase when your opponent selects one of your units as a target. You can add 1 to saving throws you make for this unit until the end of the phase.

DEFENSIVE GUNNERS

Militia & Cults Stratagem

1
CP

Use this Stratagem when a charge is declared against one of your **VEHICLE** units. When that unit fires Overwatch this phase, they hit on a 5 or a 6, rather than just a 6.

JURY RIGGING

Militia & Cults Stratagem

1
CP

Use this Stratagem at the start of your turn. Select a **MILITIA VEHICLE** from your army. It cannot move, charge or pile in this turn, but immediately heals one wound.

IMPRESSMENT

Militia & Cults Stratagem

2
CP

Use this Stratagem at the end of your movement phase. If you do, pick a unit of **MILITIA INFANTRY** in your army and remove it from the battlefield. You can then set it up again wholly within 6" of the edge of the battlefield and more than 9" from any enemy models, at its full starting strength.

FOR THE HOMEWORLD!

Militia & Cults Stratagem

1
CP

Use this Stratagem when you select one of your **MILITIA** units to shoot or fire Overwatch. Re-roll hit and wound rolls of 1 for models in that unit until the end of the phase.

BRUTAL DISCIPLINE

Militia & Cults Stratagem

2
CP

You can use this Stratagem at the start of the Morale phase. For the rest of that phase, when a **DISCIPLINE MASTER** unit uses the Instil Order ability, D3+1 models are killed, but the unit automatically passes its Morale test.

PROTECTOR OF THE REALM

Militia & Cults Stratagem

2
CP

Use this Stratagem before the battle. Your Warlord may choose an additional Warlord Trait from the Militia & Cults Warlord Traits list.

GRENADIERS

Militia & Cults Stratagem

1
CP

Use this Stratagem before a **MILITIA INFANTRY** unit from your army shoots or fires Overwatch. Up to ten models in that unit that are armed with grenades can throw a grenade this phase, instead of only one model being able to do so.

PLANETARY RELICS

1/3
CP

Use this Stratagem before the battle. Your army can have one extra Militia Relic for 1CP, or two extra Militia Relics for 3CPs. All of the Legion Relics that you include must be different and be given to different **MILITIA CHARACTERS**.

PRELIMINARY BOMBARDMENT

Militia & Cults Stratagem

2
CP

Use this Stratagem after both sides have deployed, but before the first battle round begins. Roll a dice for each enemy unit on the battlefield. On a 6, that unit suffers one mortal wound. You can only use this Stratagem once per battle.

TO THE DEATH

Militia & Cults Stratagem

1
CP

Use this Stratagem at the start of the Morale phase. Pick a **MILITIA** unit from your army that is required to take a Morale test. You can roll a D3 for the unit, rather than a D6, when taking this test.

TOPOGRAPHICAL SCAN

Militia & Cults Stratagem

2
CP

Use this Stratagem at the start of the Shooting phase. Select a **MILITIA ARTILLERY** unit from your army. You can re-roll failed to hit rolls with that unit this Shooting phase..

PREPARED GROUND

Militia & Cults Stratagem

1
CP

Use this Stratagem when an enemy unit finishes a charge within 1" of a **MILITIA RECON SQUAD** from your army that is wholly on or within a terrain feature. Roll a dice; on a 4+ that enemy unit suffers D3 mortal wounds.

WARLORD TRAITS

The lords and officers of the Imperial Army are amongst have been drawn from some of the finest martial cultures in the galaxy, and have served in the Expeditionary Fleets of the Great Crusade.

If the Warlord of your army is a Imperialis Miltia & Cults Character, you can pick their Warlord Trait from the table below, or roll a dice and consult the table to generate their Warlord Trait.

D6 Roll	Result
1	Ruthless Tyrant <i>The commander is a dark-hearted tyrant whose bloody rule has persisted for yearss; hated, but always obeyed.</i> Add 1 to the warlord's Leadership characteristic.
2	Merchant Princeling <i>The commander has risen to high rank and expended his vast personal wealth on the most favoured warriors under his command.</i> Pick an INFANTRY unit in the same detachment as the warlord; all their ranged weapons have an additional -1 AP while the Warlord is within 3" of the unit.
3	Marcher Lord <i>The commander's line has long been sworn to defend their world and protect their territory against invasion.</i> The warlord and any friendly MILITIA INFANTRY unit within 3" of him has the Objective Secured ability.
4	Beloved of the People <i>The commander's name is beloved by all their subjects; should they fall, they will be avenged.</i> If the warlord is slain, all Troops units in the same detachment may re-roll charge rolls in their next turn.
5	Connoisseur of Alien Curios <i>The commander has used the status and resources of their rank to indulge their taste for xenos technologies.</i> At the start of each of your turns, your warlord regains one previously lost wound.
6	Robber Baron <i>The commander is a famed void pirate and outcast, surviving as much by 'judgement' as by bravery and ambition.</i> The warlord and and any friendly MILITIA INFANTRY unit within 3" of him at the start of the Movement phase can treat any Advance rolls as 6 - as long as they end the move further away from the enemy deployment zone than they started.

ROGUE PSYKER DISCIPLINE

As the Imperium spread the Imperial Truth and the endless train of Black Ships took their tithe, it was rare for the armies of the Imperium to include any trained psykers. However, when the Heresy erupted, many worlds who sided with the Warmaster cast off these restrictions and the worship of ancient religions spread.

Before the battle, generate the psychic powers for Psykers that can use powers from the Rogue Psyker discipline using the table below. You can either roll a D6 to generate their powers randomly (re-roll any duplicate results), or you can select the psychic powers you wish the psyker to have.

D3 Roll	Power
1	Warp Flux <i>Warp Charge 7</i> If manifested, choose an enemy unit within 12"; it immediately suffers D3 mortal wounds. Against VEHICLES , it inflicts D6 mortal wounds instead.
2	Creeping Terror <i>Warp Charge 7</i> If manifested, choose an enemy unit within 12"; if that unit takes a Morale test in this battle round, subtract D3 from its Leadership characteristic until the end of the battle round.
3	Unnatural Vigour <i>Warp charge 10</i> If manifested, every MILITIA unit (except this unit) within 6" re-rolls failed charge rolls and re-rolls failed hit and wound rolls in the Fight phase for the rest of the turn. At the start of the Morale phase, each affected unit suffers D3 mortal wounds.

POINTS VALUES

If you are playing a matched play game, or a game that uses a points limit, you can use the following lists to determine the total points cost of your army. Simply add together the points costs of all your models and the wargear that are equipped with to determine your army's total points value.

SOLAR AUXILIA

VOID HOPLITES

This book contains all the datasheets that you will need to fight battles with your Solar Auxilia miniatures, and the rules for the weapons they can wield in battle. Each datasheet includes the characteristics profiles of the unit it describes, as well as any wargear and special abilities it may have. Any abilities that are common to several units are described below and referenced on the datasheets themselves.

KEYWORDS

Throughout this book, you will come across a keyword that is within angular brackets, specifically <FEALTY>. This is shorthand for a keyword of your choosing, as described below.

<FEALTY>

In games set in the Age of Darkness, your army will either fight on the side of the loyalists or the traitors. When you build your army, pick which you wish it to be. If you pick loyalist, then all units with the <FEALTY> keyword have this keyword changed to **LOYALIST**. If you pick traitor, then all units with the <FEALTY> keyword have this keyword changed to **TRAITOR**.

All units in your army must have the same allegiance. Some unique characters or specific units can already have **TRAITOR** or **LOYALIST** printed on their datasheet, in which case they can only be taken in armies with the matching allegiance.

SUPPORT

A unit with this keyword cannot be taken as a compulsory choice for the category of the Force Organisation chart that it is in.

ABILITIES

DISCIPLINED FIRE

Models with this ability hit on a 5+ when firing overwatch, as long as they are firing with Pistol, Rapid Fire or Assault weapons.

CLOSE FORMATION FIGHTING

So long as two friendly **SOLAR AUXILIA** models with this ability are in base-to-base contact when they are activated in the Fight phase, they may re-roll hit rolls of 1 for the duration of that Fight phase.

EXPLORATOR ADAPTION

Models with this ability have a 6+ invulnerable save. They do not get this save against melta, plasma, volkite or laser weapons (weapons with 'melta', 'plasma', 'volkite', 'las' or 'laser' in their name).

PLAYING GAMES IN THE AGE OF DARKNESS

Lords of War: Your armies may include detachments of Lords of War as normal, but the total points value/power rating of the Lords of War choices in your army may not be more than 25% the total army points value/power rating, rounding up.

Cities of Death: The battlefields of the Horus Heresy were nightmarish sites of destruction. We recommend using the Advanced Rules for terrain from page 260 of the Warhammer 40,000 rulebook, including counting all ruins as City Ruins.

Psychic focus: With the exception of Smite, each psychic power can be attempted only once per turn, rather than once per psyker per turn. In addition, you must add 1 to the warp charge value of Smite for each attempt (whether successful or not) that has been made to manifest Smite during a given Psychic phase, to a maximum warp charge value of 11.

Strategic Discipline: The same Stratagem cannot be used by the same player more than once during any single phase.

Sudden Death: If, at the end of any battle round, one player has no models left on the battlefield, the game ends immediately and that player loses. Fortifications do not count for the purposes of this rule.

Tactical Reserves: Instead of being set up on the battlefield during Deployment, many units have the ability to be set up on teleportariums, in high orbit, in ambush, etc., in order to arrive on the battlefield mid-game as reinforcements. When setting up your army during Deployment for a matched play game, at least half the total number of units in your army must be set up on the battlefield, and the combined points value of all the units you set up on the battlefield during Deployment (including those that are embarked within Transports that are set up on the battlefield) must be at least half of your army's total points value, even if every unit in your army has an ability that would allow them to be set up elsewhere.

Furthermore, in matched play games, units that are not placed on the battlefield during deployment in order to arrive on the battle mid-game as reinforcements cannot arrive on the battlefield during the first battle round. Finally, any unit that has not arrived on the battlefield by the end of the third battle round in a matched play game counts as having been destroyed.

Medi-pack: At the end of any of your Movement phases, the Medicae can attempt to heal or revive a single model. Select a friendly **SOLAR AUXILIA INFANTRY** unit within 3" of the Medicae. If that unit contains a wounded model, it immediately regains D3 lost wounds. If the chosen units contains no wounded models, but one or more of its models have been slain during the battle, roll a D6. On a 4+ a single slain model is returned to the unit with 1 wound remaining. If the Medicae fails to revive a model he can do nothing for the remainder of the turn (shoot, charge, fight, etc.) as he recovers the gene-seed of the fallen warrior. A unit can only be the target of the Medi-pack ability once in each turn.

Attached Deployment: During deployment, all models in this unit must be set up at the same time, they do not need to be in unit coherency. From that point on, each Medicae Orderly is treated as a separate unit.

ABILITIES

Explorator Adaption

Induction Chargers: Once per battle at the start of any of your Movement phases, you may activate this unit's induction chargers. The unit may Advance and still fire all it's weapons this turn, and ignores the usual -1 penalty for moving and firing heavy weapons.

Grinding Advance: If this model moves under half speed in its Movement phase (i.e. it moves a distance in inches less than half of its current Move characteristic) it can shoot its turret weapon twice in the following Shooting phase (the turret weapon must target the same unit both times). Furthermore, hit rolls for this model's turret weapon do not suffer the penalty for moving and shooting a Heavy weapon. The following weapons are turret weapons: battle cannon, demolisher cannon, twin lascannon, exterminator autocannon and vanquisher battle cannon.

Smoke Launchers: Once per game, instead of shooting any weapons in the Shooting phase, this model can use its smoke launchers; until your next Shooting phase your opponent must subtract 1 from all hit rolls for ranged weapons that target this vehicle.

Explodes: If this model is reduced to 0 wounds, roll a D6 before removing it from the battlefield and before any embarked models disembark. On a 6 it explodes, and each unit within 6" suffers D3 mortal wounds.

After the Primaris-Lightning has moved, pick one enemy unit that it flew over. Then roll a D6 for each model in the unit, up to a maximum of 10 dice (roll two dice for each VEHICLE or MONSTER in the unit). For each roll of a 4+, the unit being bombed suffers a mortal wound.</p> <p>Battle servitor control: A model with Battle Servitor Control increases by one the Strength of any ranged weapons that target a VEHICLE unit.</p> <p>Ground-tracking auguries: A model with ground-tracking auguries can re-roll hit rolls of a '1' when targeting a unit that does not have the FLY keyword.</p> <p>Ramjet diffraction grid: This model has a 5+ invulnerable save against ranged weapons.</p>

WARGEAR OPTIONS

- This model can replace any of its multi-lasers with any of the following: heavy flamers, heavy bolters or lascannon.
- This model can take a hunter-killer missile.
- This model can take a pintle weapon; either a multi-laser or heavy flamer.

ABILITIES

Co-axial weapon: If during the same Shooting phase this model fires its Stormhammer cannon at the same target as its co-axial multi-laser, it may re-roll any hit rolls with its Stormhammer cannon.

Explodes: If this model is reduced to 0 wounds, roll a D6 before removing it from the battlefield; on a 6 it explodes and each unit within 2D6" suffers D6 mortal wounds.

Smoke Launchers: Once per game, instead of shooting any weapons in the Shooting phase, this model can use its smoke launchers; until your next Shooting phase your opponent must subtract 1 from all hit rolls for ranged weapons that target this vehicle.

Steel Behemoth: This model can Fall Back in the Movement phase and still shoot and/or charge during the controlling player's turn. It can fire its weapons if enemy units are within 1" of it (but only its twin heavy bolter and twin heavy flamer may target units within 1" of it - its other guns must target other units). In addition, this model only gains a bonus to its save in cover if at least half of the model is obscured from the bearer.

THE SOLAR PATTERN

In this section you'll find rules for Battle-forged armies that include Solar Auxilia Detachments - that is, any Detachment which only includes SOLAR AUXILIA units. These rules include the abilities below and a series of Stratagems. This section also includes the Astartes' unique Warlord Traits, Psychic Disciplines and Relics. Together, these rules reflect the character and fighting style of the Imperial Army in your games.

ABILITIES

If your army is Battle-forged, Solar Auxilia Detachments within it gain the following abilities:

OBJECTIVE SECURED

If your army is Battle-forged, all Troops units in **SOLAR AUXILIA** detachment gain this ability. Such a unit that is within range of an objective marker (as specified in the mission) controls the objective marker even if there are more enemy models within range of that objective marker. If an enemy unit within range of the same objective marker has a similar ability, then the objective marker is controlled by the player who has the most models within range of it as normal.

ADDITIONAL LORDS OF WAR

In addition to the vehicles listed in this document, bear in mind that your army can also include detachments of Crusade Reserves as listed in the *Battles in the Age of Darkness* document.

HOLD THE LINE

If your army is Battle-forged, you always score an additional Victory Point if, at the end of the battle, three friendly **SOLAR AUXILIA** units with Objective Secured and no enemy units with Objective Secured are within your deployment zone.

WARLORD TRAITS

The officers of the Solar Auxilia are amongst the elite of the Imperial Army, and have served at the fore of the Expeditionary Fleets of the Great Crusade.

If the Warlord of your army is a **SOLAR AUXILIA CHARACTER**, you can pick their Warlord Trait from the table below, or roll a dice and consult the table to generate their Warlord Trait.

DISCIPLINED COMMAND

If you choose a **SOLAR AUXILIA** model as your warlord, it must be the highest ranking in the army. In order, this must be a Lord Marshall (or Ireton MaSade), a Legate Commander, a Strategos, and then finally a Tank Commander.

D6 Roll	Result
1	Uncanny Survivor <i>The warlord has outlived many enemies; both the cruel claws of the xenos and the blades of his rivals have failed to lay him low.</i> If your warlord suffers a wound, roll a dice; on a roll of 6, ignore that wound.
2	Shattering Bombardment <i>The Solar Auxilia's armoured reserves are infamous for the deadly effect to which their firepower can be put.</i> At the start of each Shooting phase, select a single weapon in an ARTILLERY unit within 6" of the warlord. You may re-roll hit rolls with this weapon until the end of the phase.
3	Bitter Blood <i>A duellist of deadly repute, the warlord's abilities in hand-to-hand combat are not to be underestimated.</i> The warlord may re-roll hit rolls against enemy CHARACTERS .
4	Blind Barrage <i>One tactic employed by the Solar Auxilia is to precede battle with a barrage of smoke into which fields of fire have been prepared.</i> In the first battle round of the game, all friendly SOLAR AUXILIA units gain the benefit of cover, even if they are not in cover.
5	Void Master <i>The warlord has faced many strange perils on distant and nightmare worlds. The horrors of the battlefield hold little fear.</i> The warlord and any friendly unit within 3" may re-roll failed Morale tests and ignore any movement penalties from battlefield terrain.
6	Siege Master <i>The warlord is a veteran of uncounted sieges and knows the vulnerabilities in his enemy's defences.</i> After deployment is finished but before the first turn of the game, you may nominate a single piece of terrain; this piece of terrain no longer provides the benefit of cover.

RELICS OF SATURN

The pattern for the Solar Auxilia came from the ancient Void Hoplites of the Saturnyne Confederacy, an early acquisition by the expanding Imperium and a culture that had survived Old Night on it's own terms. It's unique technology and relics can still be found amongst the oldest of the Solar Auxilia regiments.

If your army is led by a Solar Auxilia Warlord, you may give one of the following Relics to a Solar Auxilia Character in your army. Named characters already have one or more rare artefacts, and so cannot be given any of the following relics. Note that some weapons replace one of the character's existing weapons. Where this is the case, you must, if you are playing a matched play game or are otherwise using points values, still pay the cost of the weapons being replaced. Write down any Relics your charcaters may have on your army roster.

APEX DIGITAL WEAPON

Digital weapons have been in use for millenia, and some of the oldest human tech-guilds are able to make examples of unparalleled power. This relic is an extremely advanced example.

Roll a dice at the end of each Fight phase for each enemy unit that is within 1" of the bearer of this relic; on a 4+ that unit suffers a mortal wound.

CLOAKING ARRAY

This relic generates a highly localised refraction field that distorts light and other waveforms in such a way as to render the bearer invisible to the naked eye and most forms of machine scanner.

Ranged attacks targeting the bearer of the Cloaking Array suffer a -1 penalty to hit rolls.

COMBAT AUGMENT ARRAY

It is posited that this device was once used to transform entire plantary populations into killing machines at a single command, enabling simple colonists to become super-soldiers. Though dangerous to use, extant examples command a high price indeed.

Add 1 to the bearer's Strength and Attacks characteristics.

METAPHASIC READER

This is an extremely advanced battlefield cogitator and simulator, used to predict enemy movements and generate likely outcomes from the examples in it's memory coils.

Each time your opponent uses a Stratagem, roll a D6. On a 5+ you gain 1 Command Point.

NANYTE BLASTER

This is a bullet shaped weapon of gleaming metal that hosts a hive of nanoscopic machines. Upon release, they are capable of stripping a target to it's constituent atoms in an instant.

This weapon replaces a model's bolt pistol. It has the following profile:

WEAPON	R	TYPE	S	AP	D	ABILITIES
Blaster	12"	Pistol	3	5	-2	1 -

PHASE WALKER

Very few examples of this technology have been recovered. The relic uses a phase dilation generator to allow it's bearer to 'phase-walk' from one location to the next in an instant, making it highly prized by assassins and saboteurs.

Once per game, at the end of any of your Movement phases, the bearer of the Phase-walker can teleport instead of moving normally. When they do so, remove them from the battlefield and then replace them anywhere that is within 18" of their starting position and more than 9" from any enemy models.

VOID SHIELD HARNESS

An extremely rare advancement in void shield technology, this harness carries enough energy to project a field around the wearer, enveloping them in the same fields that are used to protect starships.

The Void Shield Harness gives a unique kind of saving throw which the controlling player can opt to use instead of their normal save or invulnerable save against any form of attack except from weapons with the Melee type. Void shield saves are unaffected by the AP of an attack, but unlike invulnerable saves, they may also be used to negate mortal wounds. In this case however, roll one dice for each mortal wound that has been inflicted on the unit, with the mortal wound being ignored if the save roll is passed. While the bearer of the Void Shield Harness has more than 1 wound remaining the void shield save is a 6+, if the bearer ever drops to 1 wound the save is reduced to a 7+ for the remainder of the game.

WARP SHUNT FIELD

A fearful hybrid of displacer field and void shield technolgy, the device projects a localised warp interface field, which is activated when it detects a high energy attack. Enemy shots are absorbed through microscopic, short-lived warp openings to protect the bearer from harm.

The bearer of a Warp Shunt Field always gains the benefit to its saving throw for being in cover. Additionally, any saving throws of 7+ made against ranged attacks inflict a mortal wound on the unit that made the attack.

STRATAGEMS

If your army is **Battle-forged** and includes any **Solar Auxilia Detachments** (excluding **Auxiliary Support Detachments**) you have access to the Stratagems shown here, and can spend **Command Points** to activate them. These reflect the unique strategies used by the Solar Auxilia on the battlefield.

TAKE COVER

Solar Auxilia Stratagem

1
CP

Use this Stratagem in your opponent's shooting phase when your opponent selects one of your units as a target. You can add 1 to saving throws you make for this unit until the end of the phase.

DEFENSIVE GUNNERS

Solar Auxilia Stratagem

1
CP

Use this Stratagem when a charge is declared against one of your **VEHICLE** units. When that unit fires **Overwatch** this phase, they hit on a 5 or a 6, rather than just a 6.

SEAL THE HATCHES!

Solar Auxilia Stratagem

1
CP

Use this Stratagem in your opponent's shooting phase when your opponent selects one of your **VEHICLE** units as a target. The 6+ invulnerable save granted by the **Explorator Adaptions** ability is increased to 5+ for that unit until the end of the phase.

PRIDE OF THE NAVY

Solar Auxilia Stratagem

1
CP

Use this Stratagem after one of your **SOLAR AUXILIA THUNDERBOLT**, **ARVUS LIGHTER** or **PRIMARIS-LIGHTNING** units completes its move in the Movement phase. You may immediately pivot the model an additional 45 degrees in either direction.

RAPID DEPLOYMENT

Solar Auxilia Stratagem

1
CP

Use this Stratagem at the start of your Shooting phase. Select a unit of **SOLAR AUXILIA INFANTRY** in your army that disembarked from a **TRANSPORT VEHICLE** this turn. You can re-roll hits of 1 with that unit until the end of the phase.

ORBITAL AUGUR SCAN

Solar Auxilia Stratagem

1
CP

Use this Stratagem immediately after your opponent sets up a unit that is arriving on the battlefield as reinforcements within 12" of one of your **SOLAR AUXILIA INFANTRY** units. Your unit can immediately shoot at that unit as if it were the Shooting phase, but must subtract 1 from all the resulting hit rolls.

GRENADIERS

Solar Auxilia Stratagem

1
CP

Use this Stratagem before a **SOLAR AUXILIA INFANTRY** unit from your army shoots or fires **Overwatch**. Up to ten models in that unit that are armed with grenades can throw a grenade this phase, instead of only one model being able to do so.

CRUSADER RELICS

Solar Auxilia Stratagem

1/3
CP

Use this Stratagem before the battle. Your army can have one extra Solar Auxilia Relic for 1CP, or two extra Solar Auxilia Relics for 3CPs. All of the Relics that you include must be different and be given to different **SOLAR AUXILIA CHARACTERS**.

SUPPORTING FIRE

Solar Auxilia Stratagem

2
CP

Use this Stratagem after a **SOLAR AUXILIA** unit from your army has inflicted an unsaved wound on an enemy unit in the Shooting phase. You can add 1 to hit rolls for any other **SOLAR AUXILIA** units from your army that target the same enemy unit this phase.

ARMOURED ASSAULT

Solar Auxilia Stratagem

2
CP

Use this Stratagem in the movement phase, before a **SOLAR AUXILIA TRANSPORT VEHICLE** unit moves. Transported models may disembark from this vehicle after it has completed its move. However, the chosen vehicle may not Advance this turn.

IMPERIAL ELITE

Solar Auxilia Stratagem

1
CP

Use this Stratagem at the start of the Morale phase. Pick a **MILITIA** unit from your army that is required to take a Morale test. You can roll a D3 for the unit, rather than a D6, when taking this test.

FROM THE MARTIAN FORGES

Solar Auxilia Stratagem

1
CP

Use this Stratagem just before a friendly **SOLAR AUXILIA** unit attacks in the Shooting phase. Each time you make a wound roll of 6+ for a **volkite** weapon, the weapon scores an additional automatic hit at the weapon's normal profile which is resolved after the initial attacks for the weapon on the same unit. These additional hits do not themselves generate more additional hits. **Volkite** weapons are any weapon that contains the word 'volkite' in its name.

POINTS VALUES

If you are playing a matched play game, or a game that uses a points limit, you can use the following lists to determine the total points cost of your army. Simply add together the points costs of all your models and the wargear that are equipped with to determine your army's total points value.

WARGEAR	DESCRIPTION
Artificer armour	A model with artificer armour improves their Save characteristic to 2+.
Battle servitor control	A model with Battle Servitor Control increases by one the Strength of any ranged weapons that target a VEHICLE unit.
Cohort vevilla	Friendly SOLAR AUXILIA units within 6" of any friendly company banner add 1 to their Leadership.
Cyber-familiar	A unit with a cyber-familiar is never slowed by battlefield terrain.
Digital lasers	A model equipped with digital lasers increases its Attacks characteristic by 1.
Displacer matrix	This model has a 3+ invulnerable save. If a 1 is rolled for this save, remove the model from the tabletop. At the end of the controlling player's following movement phase, the model re-appears; place him anywhere on the battlefield that is not within 9" of an enemy model.
Ground tracking auguries	A model with ground-tracking auguries can re-roll hit rolls of a '1' when targeting a unit that does not have the FLY keyword.
Hardened armour	This unit has a 5+ invulnerable save and gains the VOID HARDENED keyword.
Nuncio-vox	You may re-roll any hit rolls of 1 made for friendly SOLAR AUXILIA ARTILLERY or Rapiers with Quad Launchers when they target enemy units at least 36" away in the Shooting phase, if the enemy unit is within sight of this model.
Iron halo	A model with an iron halo has a 4+ invulnerable save.
Psy-jammer	A model equipped with a psy-jammer can attempt to deny one psychic power in each enemy Psychic phase, as long as the enemy psychic power targets the bearer or a unit within 6" of the bearer.
Ramjet-diffraction grid	This model has a 5+ invulnerable save against ranged weapons.
Refractor field	A model with a refractor field has a 5+ invulnerable save.
Troop Vexilla	Add 1 to the Leadership of models in a unit with a vexilla.
